FEATURES:

Siphons downhill if source is higher than receptacle @ 5 gallons / minute
Also acts as a positive displacement hand lift pump @ 28 oz. per / stroke
Constructed of rigid & flexible PVC
Non Corrosive and Non Rusting
Solvent welded for "No Leak" construction
Valves and Seals of Viton®
Rigid PVC check valve
Adapters available to fit most drum bung openings

DIMENSIONS

Barrel Length - 38"
Barrel Diameter- 1-1/2"
Hose Length - 48"
Hose Diameter- 1" OD, .75" ID

TO OPERATE

Ensure that pump is properly placed and secured in drum and that the discharge hose is directed into the receptacle.

SLOWLY lift handle **STRAIGHT** up and down to start flow

Fully extend handle to allow siphon action to commence

Siphon action stops when the handle is depressed **and** the hose is removed from receptacle

WARNING ! Plan carefully for liquid to drain from hose after dispensing

WARNING ! Remove pump from container when not in use to prevent unintentional siphon action or unauthorized use.

LIL' DOLLY™

BUCKET DOLLY

Patent #D309,811

LIL' DOLLY™

More and more, regulations are being instituted that require buckets and pails be kept OFF THE FLOOR in kitchens and hospitals to allow for easy cleaning and to eliminate the accumulation of dirt and bacteria. Beckson's Lil' Dolly™ provides an easy and inexpensive solution to these requirements and is a safe and effective alternative to moving and maneuvering heavy five gallon containers.

Features:

Patented Design
75# Capacity

5 dual wheel stem casters
11" inside diameter

Designed for use at:

Hotels
Hospitals
Restaurants

Food processing plants
Manufacturing locations
Anywhere 5, or 6 gallon pails are used
